Objectives

My short term goal is to learn the latest technologies and programming languages while enjoying the ride of being part of an ever changing exciting field. My long term professional goal is to be a key player in developing the Online Service(s) of tomorrow loaded with things like mind blowing performance and scalability.

Education

2009 - 2012 **Diploma Yrkeshögskoleutbildning, Agile Web Developer**
KYH Stockholm, Stockholm, Sweden.

Experience

2016 - present **Segundamano and Corotos, Mexico City, Mexico**
segundamano.com.mx
corotos.com.do

Senior Full Stack Developer

Segundamano is one of the largest sites for classified ads in Mexico within the Schibsted consortium with heavy traffic

Developing scalable and highly performing solutions, maintaining and developing infrastructure. During my short period in Segundamano I've been taking a lot of roles. Starting of by implementing a Elasticsearch solution in order to improve searchability, quickly moving on to be the sole developer and technical maintainer of Corotos, the market leading site for classified ads in Dominican Republic. Lately I've been developing global micro services. Technologies used amongst others, C, Go, Kubernetes, Elasticsearch, Javascript, Docker and google cloud

2014 - 2016 **Blocket AB, Stockholm, Sweden**
blocket.se

Full Stack Developer

Developing scalable and highly performing solutions. As part of the real estate team my responsibilities included integrate client API's with our services. Develop and maintain our API's. Help realtors with technical issues, working on call hours providing emergency maintenance for our systems. Technologies used amongst others, C, Python, Javascript, PHP, Docker and AWS

Blocket AB is the largest classified ads site in Sweden within the Schibsted Consortium with heavy traffic

2012 - 2014 **Chas Visual Management, Stockholm, Sweden**
chas.se

Consultant, Full Stack Developer

Chas is a consultancy firm, supplying consultants within tech and management

During my time at Chas I worked with a wide range of clients, from H&M Clothes store to Stockholm's largest Hospital. My most exciting assignment was when developing a live online bid service I implemented the API handling the payment transactions. I worked with a lot of technologies amongst others, Javascript, PHP, SQL, java and Python

2011 - 2012 **Sidfalk Borgström, Stockholm** Junior Backend developer
Sidfalk Borgström was a web bureau, making designs and websites

Developing service sites, campaign sites and for well known companies and custom blogs for celebrities. My most exciting and challenging assignment was scraping online odds and presentation for a online odds comparison service. Technologies used was amongst others, PHP, Javascript, Apache and Wordpress.

Certificates and Courses

Jun 2014 **Zend Certified PHP Engineer** License 270478182

Dec 2014 **Intermediate Python**

Feb 2015 **Core Elasticsearch** Core Elasticsearch

Volunteer Experience

2011 - 2013 **Web developer and administrator** Lanfabriken, youth technology activities organisation
Organizing events, working night shifts and general help for the children. When not working at an event I was developing and maintaining the organization's website as well as developing a tournament system for online games
