Objectives

My short term goal is to learn the latest technologies and use them with elegance and efficiency My long term professional goal is to be a key tech leader creating the Online Service(s) of tomorrow

Education

2009 - 2012 **Diploma Yrkeshögskoleutbildning, Agile Web Developer**
KYH Stockholm, Stockholm, Sweden.

Experience

2016 - present **Segundamano and Corotos, Mexico City, Mexico**
segundamano.com.mx
corotos.com.do   Senior Full Stack Developer
Segundamano is one of the largest sites for classified ads in Mexico and part of the Schibsted consortium

Developing scalable and high preforming solutions, maintaining and developing infrastructure. During my time in Segundamano I've been taking a lot of roles. Among others: implementing a Elasticsearch solution focusing on searchability, sole developer and technical maintainer of Corotos, the No. 1 site for classified ads in Dominican Republic. I've also been heavily involved in implementing micro services, deploy pipelines and our Kubernetes infrastructure. Technologies used among others: Go, Kubernetes, C, Python, Elasticsearch, Javascript, Docker, Postgres, Redis and Google Platform

2014 - 2016 **Blocket AB, Stockholm, Sweden**
blocket.se   Full Stack Developer
Developing scalable and highly preforming solutions. As part of the real estate team my responsibilities included integrate client API's with our services. Develop and maintain our API's. Maintain and develop high availability and resilience. Help realtors with technical issues, working on call hours providing emergency maintenance for our systems. Technologies used among others: C, Python, Javascript, RabbitMQ, Redis, Postgres, Memchaed, Javascript, Docker and AWS

Blocket AB is the largest classified ads site in Sweden within the Schibsted Consortium with heavy traffic

2012 - 2014 **Chas Visual Management, Stockholm, Sweden**
chas.se   Consultant, Full Stack Developer
Chas is a consultancy firm, supplying consultants within tech and management

During my time at Chas I worked with a wide range of clients, from H&M Clothes store to Stockholm's largest Hospital. My most exciting assignment was when developing a live online bid service I implemented the API handling the payment transactions. I worked with a lot of technologies amongst others, Javascript, PHP, SQL, Java and Python

| 2011 - 2012 | **Sidfalk Borgström, Stockholm** | Junior Backend Developer |

Sidfalk Borgström was a web bureau, making designs and websites

Developing service sites, campaign sites and for well known companies and custom blogs for celebrities. My most exciting and challenging assignment was scraping online odds for a online odds comparison service. Technologies used was amongst others, PHP, Javascript, Regexp, Scraping, Apache and Wordpress.

Certificates and Courses

| Jun 2014 | **Zend Certified PHP Engineer** | License 270478182 |

| Dec 2014 | **Intermediate Python** | |

| Feb 2015 | **Core Elasticsearch** | Core Elasticsearch |

| Feb 2018 | **Intermediate Elixir** | |

Volunteer Experience

| 2011 - 2013 | **Web developer and administrator** | Lanfabriken, youth technology activities organization |

Organizing events, working night shifts and general help for the children. When not working at an event I was developing and maintaining the organization's website as well as developing a tournament system for online games

Some things I've worked with

Go, Python, C, Javascript, PHP, SQL, Java, AJAX, HTML5, CSS3, Webpack, Django, Flask, React.js, Vue.js, Node.js, Redux, Symfony, Zend Framework, JQuery, Knockout JS, Angular(1&2+), Responsive design, Docker, Kuberentes, AWS, Google Cloud, Docker-compose, Vim, Linux, MacOS
